

portion so as to form an L-shape together with the intermediate portion, an overlap portion, and a head end connecting portion,

the overlap portion being formed by turning an end portion of the branch portion in U-shape,

the base end connecting portion being constructed and arranged for connection to a terminal of a sound generator by soldering, and the head end connecting portion being turned into a U-shape for connecting to a terminal of an outer circuit by pressing the head end connecting portion against the terminal,

a surface of the base end connecting portion being coated with gold by gold plating;

a surface of the head end connecting portion being coated with gold by gold plating, and

said coating with gold by gold plating being limited to the base and the head end connecting portions.

---

REMARKS

Applicant is submitting herewith proposed changes to Figures 1 and 2 with the proposed changes marked in red. The only change to the drawing is to add the designation "2e." Accordingly, it is Applicant's contention that no new matter has been added. Applicant has also added the designation "2e" to page 4 of the specification and rewritten the language on one paragraph on page 4. No new matter has been added.

Claims 4 and 5 were rejected under 35 U.S.C. § 112, first paragraph, as containing subject matter which was not described in the specification in such a way to reasonably convey to one skilled in the relevant art that the inventor's at the time the application was filed had possession of the claimed invention.
